

Supercharging Scrum Ceremonies with Gen AI

Module Guide: Supercharging Scrum Ceremonies with Gen AI

Duration: 45 minutes

Level: Intermediate

Module Goal

Enable learners to leverage AI tools to automate Scrum ceremony documentation, extract insights from team feedback, and create actionable summaries that drive continuous improvement.

Lecture 1: Daily Stand-ups - Summaries and Insights

Objective: Automate stand-up documentation and identify patterns/blockers

Required Inputs

- Daily stand-up notes from Sprint SP-25 Days 1-3
- Sprint backlog

Step 1: Generate Summary with Pattern Recognition

COSTAR Prompt:

CONTEXT: You are a Scrum Master analyzing daily stand-up notes from Days 1-3 of Sprint SP-25. Notes contain what each team member did yesterday, plans for today, and blockers.

OBJECTIVE: Create a summary highlighting progress and identify patterns across multiple days:

1. Progress summary (stories completed/in-progress)
2. Recurring blockers (mentioned multiple days)
3. Stories stuck in same status
4. Team members repeatedly blocked vs making progress

STYLE: Structured with tables for patterns, bullet points for summaries.

TONE: Factual and analytical, like a detective finding trends.

AUDIENCE: Scrum Master and Product Owner for daily tracking.

RESPONSE: Provide:

1. Daily Progress Summary (by day)
 2. Pattern Analysis Table (Blocker | Days Mentioned | Team Members Affected)
 3. Stories Not Progressing (Story ID | Days Stuck | Status)
 4. Early Warning Signals (potential future problems)
-

Step 2: Generate Prioritized Action Items (5 minutes)

COSTAR Prompt:

CONTEXT: Based on stand-up summary and identified patterns, generate specific actions the Scrum Master must take to unblock the team.

OBJECTIVE: Create prioritized action item list with clear ownership and urgency.

STYLE: Action-oriented task list.

TONE: Directive and solution-focused.

AUDIENCE: Scrum Master creating daily work plan.

RESPONSE: Provide table with:

- Action Description (specific, not vague)
- Priority (● High / ● Medium / ● Low)
- Recommended Owner
- Timeline (hours or days)
- Expected Outcome

Lecture 2: Sprint Reviews - Narratives and Feedback

Objective: Create compelling presentations and analyze stakeholder feedback

Required Inputs

- Sprint backlog

Step 1: Generate Review Narrative + Analyze Feedback

COSTAR Prompt:

CONTEXT: Preparing for Sprint SP-25 review. Sprint had challenges (6-day delays, scope issues) but recovered to deliver working checkout flow.

OBJECTIVE:

Create a compelling 5-minute sprint review presentation slides + talking script for Scrum Master.

STYLE: Storytelling for presentation; analytical summary for feedback.

TONE: Professional yet engaging; balanced honesty with optimism.

AUDIENCE: Stakeholders for presentation; Product Owner for feedback analysis.

RESPONSE:

PART A - Presentation Slides content + Script:

1. Opening Hook (capture sprint story in 2-3 sentences - sample assumed data)
2. Flow Description
3. Challenges and Recovery (brief, focus on learning - sample assumed data)
4. Results

Follow up with gamma.app presentation.

Lecture 3: Retrospectives - Deeper Insights

Objective: Synthesize feedback, identify root causes, generate solutions

Required Inputs

- Retrospective feedback (What Went Well/Poorly, Actions)
- Anonymous survey results (x/10 satisfaction)
- Slack sentiment analysis (messages, emoji trends)

Step 1: Multi-Source Synthesis + Root Cause Analysis (10 minutes)

COSTAR Prompt:

CONTEXT: Analyzing Sprint SP-25 retrospective from three sources:

1. Team retrospective (6 votes for "external dependencies")
2. Anonymous surveys (avg 4.8/10, 67% "somewhat satisfied")
3. Slack sentiment (27% negative, peaked Day 5-6)

OBJECTIVE:

1. Synthesize themes appearing across all three sources
2. Identify gaps between public and anonymous feedback
3. Perform 5 Whys analysis on payment sandbox delay
4. Determine if systemic or one-time issue

STYLE: Analytical investigation with evidence.

TONE: Insightful and non-blaming, focused on system improvement.

AUDIENCE: Scrum Master and leadership for organizational change.

RESPONSE:

PART A - Cross-Source Theme Analysis:

1. Themes in All 3 Sources (highest confidence)
2. Public vs Anonymous Gaps (what people won't say openly)
3. Sentiment Timeline Correlation (when morale shifted, why)

PART B - 5 Whys Root Cause Analysis:

1. Problem Statement
2. Five Sequential "Why" Questions and Answers
3. Root Cause Identification
4. Classification: Systemic Issue or One-Time Problem
5. Recommended Organizational Changes

Expected Output: Integrated analysis + complete 5 Whys revealing root cause
