

SOMNATH MANE

Business Intelligence & Data Engineering Lead | Power BI | Tableau | Informatica | AWS | Azure | DevOps

Pune, India | +91 7263073005 | spmane2990@gmail.com | linkedin.com/in/somnathmane-enterpriseanalytics

Dynamic and results-oriented professional with rich experience in business intelligence and data engineering, specializing in architecting robust data platforms and analytics solutions across diverse industries including Life Sciences, Pharma, BFSI, Telecom, Retail and Media.

Technical Skills

- BI & Visualization Tools:** Power BI, Tableau, MicroStrategy, SAP BusinessObjects (Webi, Universe), Tibco Spotfire
- ETL & Data Integration Tools:** Informatica PowerCenter (PWC), IBM DataStage, Azure Data Factory, Azure Databricks, Snowflake (Stored Procedures, Tasks, External Tables)
- Cloud Platforms & Services:** AWS (S3, Lambda, MWAA, Glue, Athena, Step Functions, EventBridge, IAM, Lake Formation), Azure (ADLS, Databricks, ADF), Snowflake Cloud Data Platform
- Databases & Data Warehousing:** Oracle, SQL Server, MySQL, Teradata, PostgreSQL, Snowflake, HBase
- Programming Languages:** Python, Java, Scala, JavaScript, SQL, HTML/CSS
- Big Data Technologies:** Apache Spark (RDD, DataFrame), HBase, Hive, Distributed Data Processing Frameworks
- DevOps & CI/CD Tools:** GitHub, Jenkins, Liquibase, Terraform
- Operating Systems:** Windows, Linux
- Agile & Delivery Practices:** Sprint Planning, Backlog Grooming, Daily Standups, Sprint Retrospectives, Story Point Estimation, Stakeholder & Product Owner Collaboration

Certifications & Courses

- Hands-on AI for Real-World Applications (HAAI)** | Indian Institute of Technology (IIT) Kharagpur | Nov 2024
- Microsoft Certified: Power BI Data Analyst Associate** | Microsoft | Oct 2020
- Microsoft Certified: Azure Fundamentals** | Microsoft | Jan 2022
- AWS Cloud Solutions Architect** | Coursera | May 2026
- Snowflake Data Engineering** | Coursera | May 2026

Profile Summary

Results-driven Associate Consultant / Lead Data Architect with around 14 years of experience designing, scaling, and productionizing enterprise-grade data ecosystems and advanced BI solutions. Recognized for driving data strategy across diverse domains including Life Sciences, Pharma, BFSI, Telecom, Retail, and Media. Proven track record of leading cross-functional engineering teams in delivering high-throughput, secure, and cost-optimized data platforms. Adept at bridging the gap between complex technical architectures and high-level business objectives to drive measurable ROI. Committed to leveraging emerging technologies to build resilient, future-proof data foundations that power AI and advanced analytics.

Core Expertise & Technical Proficiencies

- Technical Leadership & Delivery:** Currently leading cloud data initiatives, orchestrating multi-environment releases and mentoring engineering teams on governance, data quality and architectural best practices.
- Modern Cloud Platforms & IaC:** Expertise across AWS and Azure ecosystems—specifically provisioning and orchestrating serverless pipelines using Lambda, Glue, Athena, Step Functions, ADLS, ADF, Databricks and Terraform.
- Enterprise Data Architecture:** Expert in designing scalable ETL/ELT pipelines, complex SCD-based dimensional models and governed data marts utilizing Snowflake, Informatica PowerCenter, IBM DataStage and Teradata.
- Production Orchestration & Pipeline Stability:** Advanced execution of workflow management via Amazon MWAA (Apache Airflow), engineering robust DAGs for API ingestion, S3 event processing, schema validation and automated reconciliation frameworks.
- Semantic Modeling & Enterprise BI:** End-to-end mastery of Power BI, Tableau, MicroStrategy and SAP BusinessObjects; specializing in OLAP-style aggregations, intensive query optimization, caching strategies and robust RLS/CLS security frameworks.
- Database DevOps & Automation:** Driven champion of engineering excellence, automating database migrations and deployments using GitHub Actions, Jenkins and Liquibase.
- Decision Intelligence:** Proficient in translating raw data into enterprise value using statistical modeling, predictive analytics, segmentation and forecasting to drive data-backed business decisions.

Work Experience

Associate Consultant | Tata Consultancy Services [Jun '24 – Present]
Pune, MH, India

Client: Major Global Media & Entertainment Studio
Cloud Data Engineering, ETL & Platform Architecture

- Enterprise Data Integration:** Architected and optimized high-throughput Snowflake and IBM DataStage pipelines. Developed robust stored procedures, validation/reconciliation frameworks and executed end-to-end performance tuning across dimensional and reporting layers.
- Serverless & Event-Driven Operations:** Managed and enhanced AWS serverless solutions (Lambda, Glue, Athena, Step Functions). Resolved complex production anomalies and implemented strategic performance fixes across high-throughput architectural ecosystems.
- Production Orchestration & Stability:** Stabilized production Amazon MWAA (Apache Airflow) environments. Spearheaded DAG troubleshooting, execution monitoring and scheduling optimization for API/S3 ingestion pipelines, conditional branching and automated alerting for Snowflake loads.
- Pipeline Hardening & Security:** Directed enhancements, critical bug resolution and vulnerability remediation for AWS Lambda event-driven architectures involving S3 triggers, DynamoDB integrations, Parquet transformations and archival routing.
- Infrastructure as Code (IaC):** Standardized and provisioned AWS cloud infrastructure (S3, Lambda) using Terraform. Configured EventBridge architectures and engineered least-privilege IAM roles/policies to ensure secure execution patterns.
- Database DevOps & CI/CD:** Engineered automated deployment pipelines utilizing GitHub, Jenkins and Liquibase. Streamlined multi-environment database schema migrations and zero-downtime rollback capabilities to eliminate deployment risks.
- GenAI & Engineering Acceleration:** Accelerated the development lifecycle by integrating Snowflake Cortex, GitHub Copilot and LLMs to automate SQL generation, streamline debugging and optimize ETL efficiency.

BI Engineering, Semantic Modeling & Reporting (Tableau / SAP BO)

- BI Engineering & Advanced Semantic Modeling:** Spearheaded the development and optimization of enterprise reporting solutions within Tableau; engineered complex calculated fields, advanced Level of Detail (LOD) expressions and dynamic parameter controls while driving rigorous query tuning and extract optimization to ensure high performance and seamless dashboard responsiveness.
- High-Scale Semantic Architecture:** Engineered enterprise-level semantic abstractions within SAP BusinessObjects, designing highly complex Universe models, context resolution rules and advanced query optimizations for cross-functional business intelligence.

Achievements

- **Earned Best Team and Smiles** awards at **TCS** by championing innovation and collaboration, while also receiving individual **AI Idea Generator** and **AI Spark** honors in hackathons.
- **Achieved** promotion to **Manager** at **Deloitte** in recognition of strong ownership and leadership in delivering advanced **Power BI, Azure Data Factory (ADF) and Azure Databricks** solutions.
- **Led** critical onsite engagements at **Cognizant** for major telecom clients in **Muscat (Oman)** and **Mumbai**, earning **Analytics and Information Management Wizards** and **Valuable Contribution** awards for technical leadership and delivery excellence.

Education

- **MBA (Executive) – Specialization in Business Analytics (MBA-X)**
Distance Learning Program
NMIMS Global Access – School for Continuing Education | Oct 2020 – Mar 2023 | GPA: **3.25/4.0**
- **Bachelor of Technology (B.Tech) – Electrical Engineering**
College of Engineering, Pune | Jun 2008 – Jul 2012 | GPA: **5.92/10.0**
- **H.S.C.** | Pune, Maharashtra, India | 2007 | Marks: 87%
- **S.S.C.** | Pune, Maharashtra, India | 2005 | Marks: 83%

Agile Delivery & Sprint Leadership

- Actively participating in and occasionally leading, Sprint Planning, Backlog Grooming, Daily Standups and Sprint Retrospectives to drive iterative, high-quality delivery.
- Collaborating with Product Owners to define acceptance criteria, estimate story points and map technical delivery dependencies across the sprint backlog.
- Managing cross-functional sprint deliverables to ensure on-time, high-quality production releases.

Manager | Deloitte Touche Tohmatsu India LLP [Dec '21 – May '24]
Pune, MH, India

Client Focus: Global Consumer Goods & Retail Leader (Fast-Moving Consumer Goods / FMCG)

- **Led Agile Delivery & Sprint Management:** Facilitated Scrum ceremonies (Sprint Planning, Backlog Grooming, Standups, Retrospectives); partnered with Product Owners to define acceptance criteria, manage story point estimation, resolve cross-team technical dependencies and ensure predictable production releases.
- **Engineered NRM & Predictive Analytics:** Designed a flagship Net Revenue Management (NRM) analytics engine using Power BI, Python and R; implemented linear regression, correlation analysis and Price Pack Architecture (PPA) to optimize pricing, trade investments and margins.
- **Optimized Power BI & Semantic Layers:** Hardened enterprise report performance by tuning complex DAX expressions, refining data model architecture and restructuring dataset refresh mechanisms to drastically reduce dashboard latency.
- **Collaborated on Cloud Data Orchestration:** Partnered with data platform teams to support and scale robust Azure-based ETL/ELT pipelines utilizing Azure Data Factory, Azure Data Lake Storage and Azure Databricks.
- **Drove Assortment & Strategy Modeling:** Built R-backed analytical frameworks and rule-based dashboards to automate market whitespace identification, execute pricing impact assessments and deliver data-driven product assortment optimization.

Associate | Cognizant [Aug '12 – Dec '21]
Pune, MH, India

Healthcare & Pharmaceutical Industry

Clients: US Pharmaceutical, Global Pharmaceutical, UK Pharmaceutical

Core Focus: Enterprise Cloud Migrations, Patient Journey Analytics, Financial Compliance & DWBI Modernization

- **DWBI Modernization & Tenant Migrations:** Executed an enterprise-scale Power BI tenant migration and post-acquisition rationalization during an Office 365 consolidation. Handled full-lineage analysis, source system impact assessment and complete migration of datasets, semantic models, apps and dataflows.
- **Advanced Analytics & Semantic Modeling:** Designed high-performance, star-schema Power BI semantic models and advanced DAX engines to drive complex healthcare KPIs, patient journey analytics, clinical cohort analysis and multi-dimensional analytics.
- **Financial Reporting & Data Validation:** Engineered global financial reporting solutions (P&L, revenue, cost, headcount) aligned with strict global corporate finance hierarchies. Led end-to-end System Integration Testing (SIT), advanced SQL-driven ETL validation and data reconciliation across Oracle and Informatica pipelines.
- **Platform Governance & Integration:** Orchestrated Power BI Service governance (gateways, workspace administration, Row-Level Security) and delivered a cutting-edge Power Apps–Power BI integration POC to enable data write-back capabilities.

Telecommunications Industry

Clients: Major Omani Telecom, Major Indian Telecom

Core Focus: High-Volume Subscriber Analytics, Multi-Platform BI Administration & ETL Integration

- **Enterprise Semantic Architecture:** Designed and optimized complex semantic layers across both MicroStrategy (attributes, facts, hierarchies, VLDB tuning) and SAP BusinessObjects (Universes, complex contexts, derived objects) tailored for massive telecom datasets.
- **Domain-Specific Analytics Dashboards:** Built executive-level dashboards and reporting ecosystems (WebI, MicroStrategy, Tibco Spotfire) for critical telecom domains including billing, subscriber lifecycles, recharge patterns, customer churn and marketing analytics.
- **Full-Stack BI & Platform Administration:** Managed full platform administration for MicroStrategy Intelligence Server and SAP BO Central Management Console (CMC), overseeing user provisioning, robust security configurations, automated scheduling and distribution frameworks.
- **Data Sourcing & Infrastructure Engineering:** Directed offshore environment setups, cross-region code deployments and supported Informatica PowerCenter ETL workflows integrated with Teradata data marts. Successfully executed a Hive-based Big Data POC for alternative data sourcing and pipeline validation.

Internal Technology R&D / Platform Engineering (Cognizant Internal Project)

Core Focus: Big Data Engineering, Predictive Modeling & Custom Analytics Applications

- **Distributed Data Pipelines:** Engineered high-throughput, distributed data processing pipelines using Apache Spark (RDD and DataFrame APIs) to ingest and transform data across HBase and MySQL environments.
- **Predictive Data Science:** Implemented advanced predictive analytics models using Python and R to execute customer segmentation, KPI forecasting and proactive churn prediction.
- **Custom Presentation Layers:** Built a bespoke analytics web presentation layer using AngularJS, Bootstrap and Thymeleaf, seamlessly integrating batch-processed Big Data outputs into interactive, KPI-driven corporate dashboards.
